

ex in how many different ways can we all line up (18 of us)?

$$18! = \underline{18} \cdot \underline{17} \cdot \underline{16} \cdot \underline{15} \cdot \underline{14} \cdot \dots \dots \dots 1$$

Def $n!$, read as n factorial.

$$n! = n(n-1)(n-2)(n-3)\dots(3)(2)(1)$$

note: for now factorials are limited to positive integers.

note: $0! := 1$

note: in a TI 84 goto the math menu \rightarrow PRB \rightarrow !

tangent:

$$y = x!$$

$$\text{domain } \{ \mathbb{Z} \geq 0 \}$$

there is a
smooth
continuous
function
that
goes through
these points
| 17 function

$$\underline{\text{ex}} \quad \frac{10!}{9!} = 10$$

$$\underline{\text{ex}} \quad \frac{10!}{7!} = 10 \cdot 9 \cdot 8 \quad \left\| \quad \frac{\text{ex}}{6!} = 10 \cdot 9 \cdot 8 \cdot 7 \right. \\ \mathbb{R}$$

$$\underline{\text{ex}} \quad \text{let } k < n \text{ and } k, n \text{ are } \mathbb{Z} \\ \frac{n!}{k!} = n \cdot (n-1) \cdot \dots \cdot (k+1) \quad \left\| \quad \frac{5!}{3!} = 5 \cdot 4 \right.$$

$$\underline{\text{ex}} \quad (3+7)! = 10! \neq 3! + 7!$$

$$\underline{\text{ex}} \quad (3!)! = (6)! = 720$$
